

Eric Vescovi

Eric is an Industrial Hygiene and Safety Intern at Safex while working on his Masters of Science, Safety Science degree at Indiana University of Pennsylvania. His expected graduation date is December, 2016. He received his graduate degree from the University of Pittsburgh.

While at Safex, Eric has had the opportunity to perform industrial hygiene sampling in many different work environments for numerous contaminants and exposures; conducted pre and post calibrations for equipment used during sampling; assisted in job site inspections on construction sites all over the Columbus area; became more familiar with the OSHA construction standard, recognized possible hazards, and adapted to the changing work environment. He has also assisted in training classes for several different OSHA topics along with written programs for the training seminar.

Prior to interning with Safex, Eric obtained additional health and safety experience through additional internships. This experience includes GHS and SDS review and development; assisted with incidence reports and accident investigations; conducted site audits and job hazard analysis for various departments in manufacturing setting and provided recommendations for improving safety programs.

Eric is a member of the American Society of Safety Engineers. He has is OSHA 30 Cards in both Construction and General Industry.
