Environmental, Safety and Health Policy Statement

Safex is passionate in its commitment to the protection of people and the environment through social, economic and environmental stewardship. We strive to create a work environment that maximizes employee well-being and safety, offers customers sustainable solutions, and leaves a positive impact on the environment.

Safex seeks to integrate sustainability into our culture and service our customers, staff and communities based on the following principles:

- Safex will meet and exceed all federal, state, local and customer environmental, safety and health regulations
- Safex will seek out opportunities to reduce our environmental impact and where appropriate, encourage our clients to do the same
- Safex applies company-wide operational best practices to reduce our resource consumption and waste
- Safex implements applicable ES&H training for staff and enlists their support in sharing our core values and improving the company's performance
- Safex recognizes the importance of community and is dedicated to supporting charitable contributions/sponsorships, in-kind services and volunteer activities.
