

Alex Kaszer, GSP

Alex Kaszer is a Graduate Safety Professional (GSP) who joined Safex in 2017.

As a safety specialist, he conducts onsite safety audits for many of Safex's construction clients and provides safety support and assistance for a variety of different types of construction companies. In addition to conducting onsite safety audits, Alex assists clients with the development of site-specific health and safety plans, delivers toolbox talks, and constructs Job Hazard Analyses. He has developed and conducted training classes for fall protection, scaffold safety, implementing the new silica standard and respirator fit testing.

Alex's professional experience includes assisting with industrial hygiene exposure assessments including sampling for silica, lead, and other total particulates. He has also assisted in evaluating residential and commercial buildings exposures to mold and mold spores. Qualitative and quantitative respirator fit testing is another area in which Alex has experience.

Prior to Safex, he was a safety intern for Vogel Disposal Services, a waste management company located outside of Pittsburgh, Pa. During this time, Alex gained valuable field experience conducting DOT vehicle inspections, facility audits and mapping, fire extinguisher inspections, chemical inventories, conducted a monthly training session, and delivered toolbox talks.

He is a member of the American Society of Safety Engineers and has previously completed his OSHA 30-Hour Construction and General Industry Training. Upon graduation, Alex obtained his GSP and plans to earn his CSP when he becomes eligible.

Alex is a 2017 graduate from Slippery Rock University of Pennsylvania with a B.S. in Safety Management.
