

Emily Milford, GSP

Emily is a Graduate Safety Professional (GSP) specializing in quantitative industrial hygiene assessments, audit preparation, fit testing and supports the industrial hygiene department of a large chemical manufacturer. At Safex, Emily assists with instruction on respirator fit testing and has developed a safety orientation presentation for an archeological firm.

Since joining Safex, Emily has completed Industrial Hygiene for Construction and Fundamentals of Industrial Hygiene classes. Most recently, Emily became certified to teach First Aid, CPR and AED.

Emily's career at Safex began in 2014 after graduation and a year-long internship with WestRock, formerly RockTenn, paper manufacturing in Northern Alabama. While with WestRock, Emily gained experience, reviewing and updating programs and procedures, implementing a new gas monitoring system, working with the Fire Brigade, carrying out OSHA mandated training, becoming a certified emergency medical responder and successfully completing an OSHA VPP recertification audit.

Emily is part of the safety congress emergency response committee, the Central Ohio Chapter of ASSE and Central Ohio community emergency response team.

Emily has a B.S. in Safety, Health and Environmental Applied Science from Indiana University of Pennsylvania.
