

Jack Webster is a safety consultant who supports Safex's construction clients. Jack has 50 years of experience in the construction industry and loves helping workers stay safe on the job. In his role at Safex, he conducts site inspections for a variety of construction trades.

At Safex, Jack helps develop OSHA 10/30 training and test questions for OSHA 10/30. Additionally, he develops test questions for general industry and several other disciplines and is an OSHA outreach trainer. Previously, he was instrumental in helping create certification exams for the National Energy Management Institute Committee (NEMIC) for Fire Life Safety, Indoor Air Quality, Commissioning, and Energy Management.

Prior to joining Safex, Jack worked for United McGill Corporation, National Training Fund/International Training Institute, Energy Management Institute of Ohio, National Energy Management Institute and The National Center for Energy Management and Building Technologies.

Jack has received several awards for his contributions in the Sheet Metal Industry. He holds an OSHA 30-Hour Construction Trainer card and has a BA in Labor Education.
